

PE Protect®

3D Wall decoration-protector

Protection against liquids such as grease and oil

- ✓ Ideal against grease and oil
- ✓ Protects AND treats
- ✓ Ready for immediate use

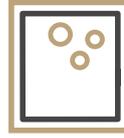

Effective, easy
and convenient to use

1

Spray several layers of PE Protect evenly on the wall to be treated from a distance of 20 cm. Then spread the product evenly with a microfibre cloth or sponge.

2

Please note: The wall must be damp for at least 10 minutes after application. If the wall dries within this time, immediately reapply the product according to step 1.

3

If the wall is still damp after 10 minutes, use the microfibre cloth or sponge to wipe product that hasn't dried over areas that absorb more quickly or appear drier.

4

Remove excess product with the microfibre cloth or sponge by rubbing down the surface treated evenly and wiping it dry without leaving any streaks.

5

After 45-60 minutes, repeat steps 1 to 4 two to three times depending on the intensity of use.

6

Allow to dry for at least 24 hours before use. Longer drying time gives a better effect.

7

If the wall is cleaned with a cleaning product, then reapply PE Protect.
